

## Himalayan Geology 'journal' Web Portal

### **INFORMATION GUIDELINES AND SPECIFICATIONS**

#### **A. BACKGROUND**

The 'Himalayan Geology' is a biannual (January and July) flagship scholarly journal of the Wadia Institute of Himalayan Geology, Dehradun. It publishes original research contributions on several aspects of geology, geophysics, sedimentology, paleontology, stratigraphy, magmatism, metamorphism, collisional tectonics, seismicity, seismogenesis, geomorphology, geological map, glaciology, hydrology, environment, climate change, natural hazards, geotechnical studies, remote sensing, natural resources about the Himalaya and other regions. Himalayan Geology also publishes scholarly invited state-of-the-art review articles presenting significant advances on any of the abovementioned themes to facilitate communication among scientists from a broad range of disciplines and interests to an international readership. The Journal encourages scholarly articles based on extensive field-based studies, experimental results, geophysical investigations, theoretical analysis, numerical simulation, and novel ideas; to propagate science in understanding some fundamental issues related to the following Key- or Index-words: geodynamics, magmatism & metamorphism, palaeontology & paleobiology, structural geology & tectonics, petrology & geochemistry, geomorphology, sedimentology & sequence stratigraphy, geophysical technique, seismology, geophysical exploration & processing, cryosphere, climate record, geodesy, biodiversity, remote sensing and GIS, soils, geo-archaeology, artificial intelligence for geoscience, natural hazards, natural resources.

#### **B. SCOPE OF WORK/OBJECTIVES**

The scope of the work includes the web designing/development and maintenance with the following online platforms and requirements (See the detailed page layouts/specimens in Annexure-II)

- 1. Explore & Search** [Contents | Volumes & Issues]
- 2. Open Access** [Online access based on login or other conditions as given by the Journal [for eg., Readers will have free online access to the content barring the present two years]
- 3. Journal Subscription with Payment** [online/offline payment]
  - a) Online e-Subscription** (Soft copy): [Life Time Subscription, Early Subscription, Article based Subscription]
    - **Life Time Subscription:** Individuals- who have purchased a life time online subscription to the journal will have access to the contents of current year.
    - **Early Subscription:** Individuals/Institutions/Book agencies- who have purchased a yearly online subscription to the journal will have access to the contents of current year.
    - **Article based Subscription:** Individuals - who have purchased an online article will have access to the contents of particular article.
  - b) Print Subscription** (Hard copy): [Life Time Subscription, Early Subscription to Individual/Institution/Book Agency]
    - **Life Time Subscription:** Individuals- who have purchased a life time print subscription to the journal will have provide the print copy of current year.

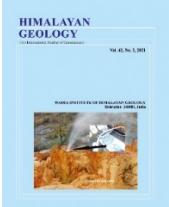

- **Early Subscription:** Individuals/Institutions/Book agencies- who have purchased a yearly print subscription to the journal will have provide the print copy of current year.
4. In addition, other publications like books, monographs, excursion guides, maps etc., may also be kept for sale on the online portal. Hence provision for the same should also be provided in the portal.
  5. **Manuscript Management System**
    - a) **Online Manuscript Submission System**
    - b) **Online Manuscript Tracking System** (with real-time status update)
    - c) **Online Manuscript Peer Review System**

(Review process between the Admin (Journal/Publisher), Editors, Reviewers and Authors)
  6. Facility to host the back issues/archives of the Journal
  7. Facility to provide data to the indexing agencies and others as deemed appropriate.
  8. Mobile compatibility (android + iOS) and CMS based unlimited dynamic contents/pages;
  9. Three (3) years post warranty AMC which includes modification, maintenance as and when required;
  10. DOI (Digital Object Identifier) names registration for published contents/articles (150 articles) for three years;
  11. SMS Gateway and Payment Gateway for three years;
  12. Any others as per requirement.

The web portal should include the following features:

- Availability of all common tabs like: Home, About Journal, Editorial Team, Journals, Other Publications, Search, Archives, Manuscript Submission, Instructions, Compliance information, Subscribe, Advertisement, Social media buttons, Contacts, Webmail, Login etc.
- Facility to conduct full text search with simple + advance options (keywords, authors, date/year, subject, speciality, image, etc.)
- References linked to full text sources
- Facility to search multiple journals
- Meta tags for articles (DC metadata), linking, search optimisation
- User access statistics and other metrics visibility
- Site structure based on Open URL
- Facility to submit comments or remarks on published articles
- Facility to search Google /AltaVista/ Indian search Engine.
- Support of Abstract, Full HTML text, PDF, Mobile HTML, Epub, etc.
- PDF downloading/sales options.
- Facility to open access/online access based on login or other conditions as given by the Journal.
- Facility to online e-subscription and print subscription with payment for the journal and other publications.
- Facility to online manuscript submission, tracking and peer review system, subscription, payment, joining, recommendation and alerts. The manuscript management system should include the features to:
  - a) Permit articles to be submitted in any supported formats (Word, PDF, etc.) from any web-connected computer/mobile 24 x7.
  - b) Provide an individualized password protected area for each authority (admin, editors, reviewer, author) with different rights and manuscript phase change options.
  - c) Generate automated SMS, e-mail notifications and reminders to authors, reviewers, admins and editors, and Mobile/SMS alerts to authors, reviewers and editors.
  - d) Track the submission and peer-review process (double blind) with real-time status update.
  - e) Contact, reply, complain, resolution and feedback options for each authority with admin control.
  - f) Generate/show ad-hoc reports including Journal performance statistics such as submission decision time, submission acceptance time, acceptance to publication time, submission/ acceptance rates, monthly reports, citation data, and other metrics etc.
- Facility to host the back issues/archive of the Journal. The vendor will have to migrate the back issues/journals data on the new portal.
- Facility to providing data to the indexing agencies such as Thomson Reutors (US), Elsevier (Netherlands), and in Indian Citation Index (India), Directory of Open Access Journals and others as deemed appropriate.
- Mobile compatibility (android + iOS) and CMS based unlimited dynamic contents/pages.

- Mobile friendly and data safety features.
- Three (3) years post warranty AMC which includes modification, maintenance as and when required.
- DOI (Digital Object Identifier) names registration for published contents/articles (150 articles) for three years
- SMS Gateway and Payment Gateway for three years;
- Any others as per requirement

## Peer Review

1. Submission
2. Access review
3. Technical corrections
4. Revised submission
5. Peer-review completion
6. Final revised submission

The process of peer review and publication in the scientific journal Himalayan Geology (HG) differs from other scientific journals. Initial access review by competent editors assures the basic scientific and technical quality of papers published in Himalayan Geology.

### Steps of the HG review process

#### 1. *Submission of original manuscript*

Original manuscripts are submitted electronically and assigned to the topical associate editor covering the relevant subject areas.

#### 2. *Access review*

The topical associate editor is asked to evaluate whether the manuscript is within the scope of the journal and whether it meets a basic scientific quality. He can suggest technical corrections (typing errors, clarification of figures, etc.) before assign the reviewer for publication in HG.

#### 3. *Technical corrections*

The authors have the opportunity to perform technical corrections, which may be reviewed by the topical associate editor.

#### 4. *Submission of revised manuscript*

Revised manuscript is accepted for review only if the authors have satisfactorily addressed all comments, and if the revised manuscript meets the high quality standards of HG ([review criteria](#)).

#### 5. *Peer-review completion*

If the manuscript is accepted for peer-review, the manuscript assigned to the referees for review.

At the end of the referee's comments, the authors may make their final response and submit a final revised manuscript. Based on the referee comments, and the authors' response, the revised manuscript is re-evaluated and rated by the editor. If rated 1–2 (excellent–good) in all of the principal criteria and specific aspects listed above, it will normally be accepted for publication in Himalayan Geology.

#### 6. *Submission final revised manuscript*

In the case of acceptance, the final revised paper is typeset and proofread. All final revised papers are also available as a print volume.

## Review criteria

Principal criteria	Excellent (1)	Good (2)	Fair (3)	Poor (4)
<b>Scientific significance:</b> Does the manuscript represent a substantial contribution to scientific progress within the scope of Himalayan Geology (substantial new concepts, ideas, methods, or data)?				
<b>Scientific quality:</b> Are the scientific approach and applied methods valid? Are the results discussed in an appropriate and balanced way (consideration of related work, including appropriate references)?				
<b>Presentation quality:</b> Are the scientific results and conclusions presented in a clear, concise, and well-structured way (number and quality of figures/tables, appropriate use of English language)?				

## Review process

Manuscripts submitted to HG at first undergo a rapid access review by the topical associate editor (initial manuscript evaluation), which is not meant to be a full scientific review. It is utilized to identify and sort out manuscripts with obvious major deficiencies in view of the above principal evaluation criteria. If they are not immediately rejected, the manuscript assigned the reviewer full peer-review.

In the full review, the referees are asked to take into account all of the following aspects:

Question	Very good	Good	OK	fair	poor
1. How would you rate the paper's contribution of new data and/or new ideas?					
2. How would you rate the overall quality of the data?					
3. How does the paper measure up relative to international standards?					
4. How clearly presented is the material?					
5. How fluent and precise is the language in presenting the material?					
6. How pertinent and understandable is the title?					
7. How effective are the figures in making the material clearer/more understandable?					
8. How would you rate the overall quality of the figures?					
9. How effective is the abstract in summarizing the material?					
10. How would you rate the author's knowledge of related work in the field?					
11. How effectively does the author give proper credit to related work?					
				Yes	No
12. Should the author(s) include more background information?					
13. Should the manuscript be expanded/more detailed?					
14. Is the paper too long for the material presented?					
15. The manuscript is acceptable in its present form.					
16. The manuscript is acceptable with minor corrections.					
17. The manuscript will be acceptable after some revision.					
18. The manuscript may become acceptable after major revision and must be reviewed again.					
19. I would be willing to review the paper again?					
20. The manuscript is not acceptable.					
21. Do you wish your name as reviewer to be made known in the author(s)?					

## Online Manuscript Submission

- [Submit your manuscript](#)
- [Manuscript preparation](#)
- [Obligations for authors](#)

### Submit your manuscript

#### HG Manuscript Registration

The image shows a screenshot of a web-based manuscript submission system. On the left, there is a 'Author Sign-in' panel with fields for 'User name' and 'Password', a 'Sign-in' button, and a 'Forgot your Password?' link. On the right, there is a 'Create an Account' panel with a single 'Create an account' button.

#### First steps

Before the submission of your manuscript to the Editorial Support for peer-review, you are kindly requested to do the following:

- to read the [general terms](#) for this journal;
- to read the [copyright](#);
- to read the [manuscript preparation](#) for this journal;
- to register the manuscript in order to receive a link to upload the manuscript files into the HG Manuscript Registration. The registration also defines the manuscript subject areas.

#### File submission for review process

After the manuscript registration, you are kindly asked to upload those files which are necessary for the peer-review process. The following files are required:

- the **abstract** (title, authors, affiliations, abstract text, keywords [sample](#)) as a \*.pdf file;
- the complete **manuscript** (title, authors, affiliations, abstract, keywords, text, tables, figures) as a \*.pdf file.

#### File submission for production process

After the acceptance of a manuscript, you will be informed by email and are kindly asked to complete the file upload for the publication production process. Then, please submit the following files:

- the actual **text** followed by the table(s) and figure caption(s) prepared in the way as outlined in the [manuscript preparation](#) as one file in MSWord format (as a \*.doc/docx file);
- all **figures**, numbered (e.g. f01, f02, ..., f11, f01a, f01b) and prepared in the way as outlined in the [manuscript preparation](#), as one \*.zip archive (or other compressed formats). Possible figure formats are \*.cdr, \*.pdf, \*.ps, \*.eps, \*.jpg, or \*.tiff

## **Remark on file sizes**

Authors are kindly asked to find the best balance between quality of figures (and submitted material) and overall file size. Individual figures should not exceed 10 MB, and the overall size of all submitted files excluding supplements should not exceed 50 MB.

## **Manuscript preparation guidelines for authors**

Manuscripts are to be written in English in a simple style. Care should be taken to avoid long and complicated sentences and unnecessary jargon. The text is to be organized as Abstract, Introduction, Methodology, Main body including Data, Results and Interpretations, Discussion, Summary and or Conclusions, Acknowledgements and References. The length of the abstract should be limited to 250 words. It should summarize the results rather than contents of the paper and should include all new taxonomic names. Citation of literature in the abstract is discouraged. The headings and subheadings should be numbered hierarchically (such as 1/ 1.1/ 1.1.1 etc.). This numbering serves as an aid in editorial process and is deleted in the final layout. The text should be printed double-spaced on one side of the paper with 30 mm margin on each side. Only names of genera and species are to be set in italics. Foot notes are not allowed.

The following sections provide guidelines on how to prepare and compose your manuscript. Please follow these standards to ensure a smooth peer-review and production process.

### **Technical instructions for MS Word and compatible formats**

[Manuscript composition](#)

[References](#)

[Visual conventions](#)

### **Technical instructions for MS Word and compatible formats**

To prepare your manuscript in a format compatible with MS Word (\*.doc, or \*.docx), please use the template files [example.doc](#). Use the Microsoft equation editor and not the graphic mode when compiling your equations.

### **Manuscript composition**

For the review process a \*.pdf file of the complete manuscript is required and the matter should be placed in the following order: title, abstract with keywords, text, appendices, acknowledgements, references, tables and figures. All matter must be consecutively and line numbers must be included.

- **Title:** Title (concise but informative), author initials and last names, full institutional addresses of all authors, correspondence email for proofs.  
Font: Times New Roman, Size: 12 pt., Space: Double and Justify
- **Abstract:** The abstract should be intelligible to the general reader without reference to the text. After a brief introduction of the topic, the summary recapitulates the keywords of the article and mentions possible directions for prospective research. Reference citations should not be included in this section, unless urgently required, and abbreviations should not be included without explanations.  
Font: Times New Roman, Size: 12 pt., Space: Double and Justify

- **Headings/Sections:** The headings of all sections, including introduction, results, discussions or summary must be numbered. The headings and subheadings should be numbered hierarchically (such as 1/ 1.1/ 1.1.1 etc.).  
1<sup>st</sup> Order: 1. Upper case + bold),      2<sup>nd</sup> Order: 1.1 (Title case + bold), 3<sup>rd</sup> Order: 1.1.1 (Title case + italic + bold), and 4<sup>th</sup> Order: 1.1.1.1 (Title case + italic) etc.
- **Appendices:** These should be labelled with capital letters: Appendix A, Appendix B etc. Equations, figures and tables should be numbered as (A1), Fig. 5 and Table 1 respectively.
- **Equations:** They should be referred to by the abbreviation "Eq." and the respective number in parentheses, e.g. "Eq. (14)". However, when the reference comes at the beginning of a sentence, the unabbreviated word "Equation" should be used, e.g.: "Equation (14) is very important for the results; however, Eq. (15) makes it clear that..."
- **Figures:** It is important for the production process that separate figures are submitted. Composite figures containing multiple panels should be collected into one file before submission. The figures should be labelled correctly with Arabic numerals (e.g. Fig. 1). They can be submitted in \*.cdr, \*.pdf, \*.ps, \*.eps, \*.jpg, or \*.tiff format and should have a resolution of at least 300-600 dpi. The width should not be less than 9 cm (for single col. Figure) and 18 cm (for double col. Figure). A legend should clarify all symbols used and should appear in the figure itself, rather than verbal explanations in the captions (e.g. "dashed line" or "open green circles").

Tips for producing high-quality line graphics:

- The first choice should be vector graphics in \*.cdr, \*.eps or \*.pdf format.
- If this is not possible, a bitmap image should be saved in a "non-lossy" format, e.g. \*.png. A high resolution is recommended. It is always possible to reduce the size of the figure later.
- The \*.jpg or \*.tiff format should only be used for photos. It is not suitable for sharp edges. Note that it is not advisable to convert a \*.jpg or \*.tiff file back to \*.png.

The abbreviation "Fig." should be used within bracket when it appears at the end of the sentence. When it appears in running text and should be followed by a number unless it comes at the beginning of a sentence, e.g.: "The results are depicted in figure 5. Figure 5 reveals that.....".

- **Figure captions:** Each illustration should have a concise but descriptive caption. The abbreviations used in the figure must be defined, unless they are common abbreviations or have already been defined in the text. Figure captions should be included in the text file and not in the figure files.
- **Tables:** Any tables should appear on separate sheets after the references and should be numbered sequentially with Arabic numerals. For the production of the accepted manuscript, they should be submitted as CorelDraw, MSWORD file. Tables submitted as a PDF or an image file cannot be processed. Tables should be self-explanatory and include a concise, yet sufficiently descriptive caption. Horizontal lines should normally only appear above and below the table, and as a separator between the head and the main body of the table. Vertical lines must be avoided. Please note that the word "Table" is never abbreviated and should be capitalized when followed by a number (e.g. Table 4).
- **File size:** Authors are kindly asked to find the best balance between the quality of figures and submitted material on the one hand, and a manageable file size on the other hand. Individual figures should not exceed 10 MB.
- **Review criteria:** While preparing their manuscript, authors are kindly requested to consider the manuscript [review criteria](#) to meet the quality standards and to reduce the peer-review processing time.

## References

The authors are organized in alphabetical and chronological order, every author separated by coma ",". References by the same author, published in the same year should be distinguished by the use of suffixes : 1999a, 1999b, 1999c. All author names are set in small letters. Publication/journal name are given in full title/name. Volume numbers are printed in bold and issue numbers are given in parenthesis followed by a coma and page numbers.

### **Examples:**

- **Single author papers:** chronologically, beginning with the oldest. If there is more than one paper in the same year, a letter (a, b, c) is added to the year, both in the in-text citation as well as in the reference list.
- **Co-author papers:** first alphabetically according to the second author's last name, and then chronologically within each set of co-authors. If there is more than one paper in the same year per set of co-authors, a letter (a, b, c) is added to the year both in the in-text citation as well as in the reference list.
- **Team papers:** first chronologically (beginning with the oldest), independent of the team author names, then alphabetically within each year according to the second (third, etc.) author. If there is more than one paper in the same year for a first author (independent of the team), a letter (a, b, c) is added to the year both in the in-text citation as well as in the reference list.

### **Examples**

Author, A. 1990. Title of paper. *Full name of journal*, **11** (2), 205-221.

Author, A.B., Author, B.C. 1991a. Title of paper. *Full name of journal*, **12** (2), 205-221.

Author, A.B., Author, B.C. 1991b. Title of paper. *Full name of journal*, **14** (2), 205-221.

Author, A.B., Author, B.C., Author, C.D. 1991. Title of paper. *Full name of journal*, **15** (2), 205-221.

Author, A.B. 1990. *Title of book*. Name of Publisher, place of publication, 150p.

Author, A.B. 1990. Title of Contribution. *In: Editor, A.B. (ed.), Title of book*. Name of Publisher, place of publication, 150p.

Author, A.B., Author, C.D. 1990. Title of Contribution. *In: Editor, A.B. & Editor, C.D. (eds), Title of book*. Name of Publisher, place of publication, 150p.

### **Literature citations in the text**

Literature citations in the text should be formatted as follows : Author (1990: 525) or (Author 1990 : 525). Two author are linked by "&": Author & Author (1990 : fig. 2). Three or more authors are abbreviated by "et al." after the first author : Author *et al.* (1990). References are separated by a semi colon ";" and year by a coma "," : Author 1990; Author 1995, 1996). Citations of figures, plates and tables are written in small letters : (Author 1990: 56, pl. 4, fig. 5) or (Author 1990 : 56, text-fig. 4, tab.4). Note that there is no coma between authors name and year of publication.

All pages of scripts, including references and explanations of illustrations, should be numbered consecutively. Papers on palaeontology must strictly follow the most recent issues of the International Codes of Zoological Nomenclature (ICZN) and Botanical Nomenclature (ICBN). In making any stratigraphical changes or erecting new stratigraphic terms the International Stratigraphic guidelines should be followed. As per the recommendations of ICZN and ICBN, all illustrated and described fossils must be registered and deposited in an appropriate permanent institution. The register number and the name of the repository (Institution) must be quoted.

In terms of in-text citations, the order can be based on relevance, as well as chronological or alphabetical listing, depending on the author's preference.

### **Example for reference sorting**

In general, in-text citations can be displayed as "Smith (2009)", or (Smith 2009)".

Literature citations in the text should be formatted as follows:

Single author reference: chronologically

Smith 1990 / Smith (1990) / Smith 1990a / Smith (1990b) / Smith 1990, 1995

Two author reference: alphabetically before chronologically

Smith & Carter 1990 / Smith & Carter (1990) / Smith & Carter 1990a / Smith & Carter 1990, 1995

More than two author reference: chronologically before alphabetically

Smith *et al.* 1990 / Smith *et al.* (1990) / Smith *et al.* 1990a / Smith *et al.* 1990, 1995

## Visual conventions

- **Mathematical symbols and formulae:** In general, mathematical symbols are typeset in italics. The most notable exceptions are function names (e.g. sin, cos), chemical formulas and physical units, which are all typeset in roman (upright) font. Matrices are printed in boldface, and vectors in boldface italics. A range of numbers should be specified as "a to b" or "a...b". The expression "a–b" is only acceptable in cases where no confusion with "a minus b" is possible.
- **Equations:** These should be numbered sequentially with Arabic numerals in parentheses on the right-hand side, e.g. (1), (2). If too long, split them accordingly. If there are chemical formulae included, e.g. reactions, please number them (R1), (R2), etc. When using Word, the equation editor and not the graphic mode should be used under all circumstances.
- **Units:** The metric system is mandatory and, wherever possible, SI units should be used. Also units in the denominator should be formatted with negative exponents (e.g. km h<sup>-1</sup> instead of km/h).
- **Date and time:** 25 July 2007 (dd month yyyy), 15:17:02 (hh:mm:ss). Often it is necessary to specify the time if referring to local time or universal time coordinated.

## General obligations for authors

1. An author's primary obligation is to present a concise, accurate account of the research performed, as well as an objective discussion of its significance.
2. A paper should contain sufficient detail and references to public sources of information to permit the author's peers to replicate the work.
3. A paper should be as concise as possible but not at the expense of scientific accuracy and completeness. To promote scientific conciseness and completeness at the same time, the inclusion of a comprehensive abstract is encouraged.
4. Papers have to be written in English, and authors should pay attention to correct spelling and grammar.
5. An author should cite those publications that have been influential in determining the nature of the reported work and that will quickly guide the reader to the initial work essential for understanding the present investigation. Information obtained privately, as in conversation, correspondence, or discussion with third parties, should not be used or reported in the author's work without explicit permission from the investigator with whom the information originated. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, should be treated similarly.
6. Fragmentation of research papers should be avoided. A scientist who has done extensive work on a system or group of related systems should organize publication so that each paper gives a complete account of a particular aspect of the general study.
7. It is inappropriate for an author to submit manuscripts describing essentially the same research to more than one journal of primary publication.
8. A criticism of a published paper may sometimes be justified; however, in no case is personal criticism considered to be appropriate.
9. To protect the integrity of authorship, only persons who have significantly contributed to the research and paper preparation should be listed as authors. The corresponding author attests to the fact that any others named as authors have seen the final version of the paper and have agreed to its submission for publication. Deceased persons who meet the criterion for co-authorship should be included, with a footnote reporting date of death. No fictitious names should be listed as authors or co-authors. The author who submits a manuscript for publication accepts the responsibility of having included as co-authors all persons that are appropriate and none that are inappropriate.

### Resubmissions and Revisions

### Submission Process

If you need help with your submission, you can click on the help signs or contact us at [himeol@wihg.res.in](mailto:himeol@wihg.res.in)

The manuscript submission process begins when you select Continue at the bottom of this page.

Continue

Click on headers below to expand sections.

### Initial Submissions

Initial submissions must contain the following elements:

1. A single article file in PDF, Word (using the [HG template](#)) with:
  - a. Title page which includes
    - Title
    - Authors' names and affiliations
    - Corresponding author's email address
    - Abstract
    - Keywords
  - b. Article body and references. The text should be double-spaced text with continuous line numbers.
  - c. Acknowledgments
  - d. Figure and table captions
2. Figures and tables can appear:
  - a. At the end of the manuscript file
    - Large tables should be uploaded separately in .xls or .cdr format for inclusion in the Supporting Information.

*A Single PDF that includes the elements above is preferred.*

## Resubmissions and Revisions

*File requirements for resubmissions and revisions are more stringent in order to facilitate rapid publication. If your manuscript is accepted, the files you upload at the resubmission/revision stage will be used for production. Resubmission and revision requirements are as follows:*

1. Publication ready files for article, figures, and supporting information :
  - a. Article files must be in Microsoft Word (\*.doc/\*.docx )
  - b. Figures must be uploaded as separate files in \*.cdr, \*.eps, \*.ps, \*.tiff, .jpg or \*.pdf format.
  - c. Tables should be embedded in the article if they are small or uploaded separately as \*.xls, or \*.xlsx files as part of the Supporting Information.
2. Response to Reviewer files
  - a. Upload a copy of your revised manuscript with changes from the original text noted or redlined.
  - b. Upload a point-by-point response to reviewer file that lists each reviewer comment and describes how the manuscript has/has not been modified in response to the comment. Upload these files as a "Response to Reviewer" file.
3. For second or later revisions, you only will need to upload those files that have changed or been revised.

## Submission Process

The general submission steps are as follows:

1. **Manuscript information:** Enter required information related to your manuscript. This will include:
  1. Pasting in the title and abstract
  2. Entering co-authors using a simple email list
  3. Recommending up to four reviewers
  4. Indicating if any potential reviewers should be included or excluded.
  5. Pasting in a cover letter, which should include a statement of the main point (do not upload a separate cover letter file).
2. **Files:** Upload manuscript and related material
3. **Validate:** Verify that uploaded manuscript files appear correctly.
4. **Submit:** Fix any required information. Click "Submit Manuscript" when ready.

After the manuscript files are uploaded and approved, they are converted to a PDF to assure universal accessibility. Users may also upload an identical PDF to speed the conversion process. After reviewing the converted files, check the "Approve" box on the Approve Files tab.

*If you need help with your submission, you can contact us at [himgeol@wihg.res.in](mailto:himgeol@wihg.res.in)*

The manuscript submission process begins when you select Continue at the bottom of this page.

**Continue**

---

## Welcome to Himalayan Geology Online Submission System

**Himalayan Geology** focuses on all aspects of the geology of Himalaya. The papers may present new data and findings and good synthesis on geology and geophysics with dominant emphasis on the Alpine-Himalayan Mountain Belt and adjoining terrains, and processes related to mountain building activities.

Editor-in-Chief: M. Jayananda

Editorial Manager: Rambir Kaushik

Current Impact factor: 1.311

Life Time Membership: India: Rs. 7500.00      Abroad: US\$ 750.00

Note: A free set of old volumes (1971-2012, subject to availability) of Himalayan Geology will be provided to the newly registered life Time Members for a limited time (Postage to be borne by the Subscriber).

## Calls for papers

**Indo-Pacific Paleoceanography and Paleoclimatology: Toward a process understanding of global climate change in a warming world**

Guest editors: Shengfa Liu, Min-Te Chen, Deming Kong - Submission deadline: 30 June 2023

The Indo-Pacific region, regulating the global ocean-atmosphere-land circulations, has pronounced regional oceanography characteristics. These signatures of the ocean environment and/or global climatic conditions are well preserved in many natural ...

**Deep structure and dynamics beneath East Asia**

Guest editors: Jianshe Lei, Xiaobo Tian, O.P. Mishra, Zhouchuan Huang. Submission deadline: 10 April 2023

Large active fault zones, strong earthquakes, and active volcanoes occur in East Asia. Therefore, it is of great importance to study the deep structure and mantle dynamics beneath this wide region. With the rapid increase of dense short-period and ...

**Ultra-deep petrolierous basins in western China**

Guest editors: Guangyou Zhu, Keyu Liu, Chuanbo Shen - Submission deadline: 15 November 2022

Abundant carbonate oil and gas resources have been found in China's deep basins, including the Jingbian, Tazhong, Halahatang, Anyue, Puguang, Yuanba, Tahe, Shunbei and other large oil and gas fields. Recent breakthroughs have been made in the ...

## Aims and scope

*Journal of Asian Earth Sciences* has an Gold Open Access journal *Journal of Asian Earth Sciences: X*. To submit to *Journal of Asian Earth Sciences: X*, please visit <https://www.editorialmanager.com/JAESX/default.aspx>.

The *Journal of Asian Earth Sciences* is an international interdisciplinary journal devoted to all aspects of research related to the solid Earth Sciences of Asia. The Journal publishes high quality, peer-reviewed scientific papers on the regional geology, tectonics, geochemistry and geophysics of Asia. It will be devoted primarily to research papers but short communications relating to new developments of broad interest, reviews and book reviews will also be included. Papers must have international appeal and should present work of more than local significance.

The scope includes deep processes of the Asian continent and its adjacent oceans; seismology and earthquakes; orogeny, magmatism, metamorphism and volcanism; growth, deformation and destruction of the Asian crust; crust-mantle interaction; evolution of life (early life, biostratigraphy, biogeography and mass-extinction); fluids, fluxes and reservoirs of mineral and energy resources; surface processes (weathering, erosion, transport and deposition of sediments) and resulting geomorphology; and the response of the Earth to global climate change as viewed within the Asian continent and surrounding oceans.

**Benefits to authors**  
We also provide many author benefits, such as free PDFs, a liberal copyright policy, special discounts on Elsevier publications and much more. Please click here for more information on our author services.

Please see our [Guide for Authors](#) for information on article submission. If you require any further information or help, please visit our [Support Center](#)

This journal welcomes contributions that support and advance the UN's sustainable development goals, in particular SDG 13 (Climate Action)

Instructions for Authors Instructions for Reviewers About the Journal Contact Editorial Office

**First-time users:** Please click on the word "Register" in the navigation bar at the top of the page and enter the requested information. Upon successful registration, you will be sent an e-mail with instructions to verify your registration. **NOTE:** If you received an e-mail from us with an assigned user ID and password, DO NOT REGISTER AGAIN. Simply use that information to login. Usernames and passwords may be changed after registration (see instructions below).

**Repeat users:** Please click the "Login" button from the menu above and proceed as appropriate.

**Authors:** Please click the "Login" button from the menu above and login to the system as "Author." You may then submit your manuscript and track its progress through the system.

**Reviewers:** Please click the "Login" button from the menu above and login to the system as "Reviewer." You may then view and/or download manuscripts assigned to you for review or submit your comments to the editor and the authors.

**To change your username and/or password:** Once you are registered, you may change your contact information, username and/or password at any time. Simply log in to the system and click on "Update My Information" in the navigation bar at the top of the page.

Before submitting your manuscript, we encourage you to link your ORCID iD and authenticate it. This will allow you to share information with other systems, ensure you get recognition for all your contributions and reduce the risk of errors. Once authenticated, you can login to this journal using your ORCID ID as well.

You will only need to do this once in this journal to permanently associate your ORCID iD with your EM user record.

The order in which the attached items appear is the order established by this publication. You may re-order any items of the same type manually if necessary.

**Data in Brief (optional)**  
We invite you to convert your supplementary data (or a part of it) into an additional journal publication in Data in Brief, a multi-disciplinary open access journal. Data in Brief articles are descriptions of the data and associated metadata which are often overlooked in supplementary material, or descriptions of the complete dataset related to your research article which you have deposited in an external data repository. Submissions to Data in Brief are actively reviewed, indexed, given a DOI and made freely available upon publication. A data article will make your data easier to find, easier to reproduce, and easier to cite. Please use the Data in Brief template to write your data article and follow the 'Co-submission Instructions' in this template.  
As Data in Brief is open access, a moderate fee (APC) is payable by the author or research funder to cover the costs associated with publication. For more information about the APC please see: [www.elsevier.com/journals/data-in-brief/2352-3409/open-access-journal](http://www.elsevier.com/journals/data-in-brief/2352-3409/open-access-journal).  
For any questions, please send your inquiries to [dib@elsevier.com](mailto:dib@elsevier.com)

**MethodsX (optional)**  
We invite you to submit a method article alongside your research article. This is an opportunity to get full credit for the time and money spent on developing research methods, and to increase the visibility and impact of your work. If your research article is accepted, we will contact you with instructions on the submission process for your method article to MethodsX. On receipt at MethodsX it will be editorially reviewed and, upon acceptance, published as a separate method article. Your articles will be linked on ScienceDirect. Please prepare your paper using the MethodsX Guide for Authors and template available here: [MethodsX template](#). Open access fees apply.

Abstract

Abstract (required) ✓ Limit 250 words Word Count: 143

The Kishtwar-Chamba-Zanskar region in the Kashmir Himalaya show increased earthquake activity during last few years, especially, after 2013 earthquake sequence in Kishtwar area that includes the M W 5.6 Kishtwar earthquake in 2013. More recently, a similar sequence (2019-2020) has been recorded in the east (Zanskar) and southeast (Chamba) of Kishtwar area. We evaluate the present seismicity scenario of Kishtwar-Chamba-Zanskar region, which involves spatio-temporal analysis, energy budget, slip-deficit and coulomb stress transfer, using a homogenised earthquake catalogue for the period from 1965 to July, 2020. The analysis suggest that 2013 sequence occurred after a quiescence of ~23 years i.e. from 1991 to April 2013 and the study region was under stress shadow, created by past large earthquakes occurred at regional distances, such as M W 6.6 Uttarakashi earthquake (1991) and M W 7.6 Kashmir earthquake (2005). Further, the recent seismic activity since

The screenshot shows the 'Suggest Reviewers' step of a manuscript submission process. At the top, there's a navigation bar with various links like HOME, LOGOUT, HELP, REGISTER, etc. Below it, the journal logo 'Journal of Asian Earth Sciences' is displayed. The main area has six circular icons representing different steps: Article Type Selection (green checkmark), Attach Files (red exclamation mark), Review Preferences (blue downward arrow), Additional Information (light blue circle), Comments (light blue circle), and Manuscript Data (light blue circle). The 'Article Type Selection' step is highlighted with a green checkmark. The 'Attach Files' step has a red exclamation mark. The 'Review Preferences' step has a blue downward arrow. The other three steps have light blue circles. Below these icons, a message says 'Please provide the requested information.' followed by a section titled 'Suggest Reviewers' with instructions. A table lists the current suggested reviewers: Ramesh Kumar and Raj Kumar, each with edit and delete icons. There are buttons to add, oppose, or proceed. At the bottom, there are 'Back', 'Proceed', and 'Next' buttons.

- [General obligations for editors](#)
- [Obligations for referees](#)

Registrar as a Reviewer

The image shows a login interface for a "Reviewer". It features two input fields: one for "User ID" and one for "Password", both with placeholder text "Enter User ID" and "Enter Password" respectively. To the right of the password field is a small orange "Log In" button with a right-pointing arrow. Below the fields are two blue hyperlinks: "New user?" and "Lost login?", separated by a vertical line.

### General obligations for editors

1. An editor should give unbiased consideration to all manuscripts offered for publication, judging each on its merits without regard to race, gender, religious belief, ethnic origin, citizenship, or political philosophy of the author(s).
2. An editor should process manuscripts promptly.
3. The editor has complete responsibility and authority to accept a submitted paper for publication or to reject it. The editor may confer with other editors or referees for an evaluation to aid in making this decision.
4. The editor and the editorial staff should not disclose any non-public information about a manuscript under consideration to anyone other than referees and potential referees. Referee reports and referee identity can be shared with another editor if the processing of the submission is transferred.
5. An editor should respect the intellectual independence of authors.
6. Editorial responsibility and authority for any manuscript authored by an editor and submitted to the editor's journal should be delegated to some other qualified person, such as another editor or an associate editor of that journal. Editors should avoid situations of real or perceived conflicts of interest. If an editor chooses to participate in an ongoing scientific debate within his or her journal, the editor should arrange for some other qualified person to take editorial responsibility.
7. Editors should avoid situations of real or perceived conflicts of interest in which the relationship could bias judgement of the manuscript. Such conflicts may include, but are not limited to, handling papers from present and former students, from colleagues with whom the editor has recently collaborated, and from those at the same institution.
8. Unpublished information, arguments, or interpretations disclosed in a submitted manuscript should not be used in an editor's own research except with the consent of the author.
9. If an editor is presented with convincing evidence that the main substance or conclusions of a paper published in an editor's journal are erroneous, the editor should facilitate publication of an appropriate paper pointing out the error and, if possible, correcting it.

## **General obligations for referees**

1. In as much as the reviewing of manuscripts is an essential step in the publication process, every scientist has an obligation to do their fair share of reviewing.
2. A chosen referee who feels inadequately qualified or lacks the time to judge the research reported in a manuscript should return it promptly to the editor.
3. A referee of a manuscript should judge objectively the quality of the manuscript and respect the intellectual independence of the authors. In no case is personal criticism appropriate.
4. A referee should be sensitive even to the appearance of a conflict of interest when the manuscript under review is closely related to the referee's work in progress or published. If in doubt, the referee should return the manuscript promptly without review, advising the editor of the conflict of interest or bias.
5. A referee should not evaluate a manuscript authored or co-authored by a person with whom the referee has a personal or professional connection if the relationship has the potential to bias judgement of the manuscript.
6. A referee should treat a manuscript sent for review as a confidential document. It should be neither shown to nor discussed with others except, in special cases, persons from whom specific advice may be sought; in that event, the identities of those consulted should be disclosed to the editor.
7. Referees should explain and support their judgements adequately so that editors and authors may understand the basis of their comments. Any statement that an observation, derivation, or argument had been previously reported should be accompanied by the relevant citation.
8. A referee should be alert to failure of authors to cite relevant work by other scientists. A referee should call to the editor's attention any substantial similarity between the manuscript under consideration and any published paper or any manuscript submitted concurrently to another journal.
9. Referees should not use or disclose unpublished information, arguments, or interpretations contained in a manuscript under consideration, except with the consent of the author.

## Reviewer Instructions

### Navigating the System

When you first log into the system, you will be taken to your home page, also called your desktop. The manuscript you have agreed to review will be under Reviewer Tasks and will be marked with a red arrow  . After clicking on this link, you will be presented with a manuscript screen containing:

- Reviewer instructions
- Manuscript details and files
- Review form (accessible by clicking on "Review manuscript" link)

### Printing the Manuscript

When printing a copy of the manuscript pdf, modify print settings: Under Page Handing/Page Scaling, choose "Shrink to Printable Area." If you experience difficulties opening or printing files, contact

[Editorial support](#).

### Review Criteria

You may wish to consider these questions when writing your formal review. Answering them is not required:

1. Should the author(s) include more background information? (**drop down options: Yes or No**)
2. Should the manuscript be expanded/more detailed?
3. Is the paper too long for the material presented?
4. Is the manuscript acceptable in its present form?
5. Is the manuscript acceptable with minor corrections?
6. Is the manuscript acceptable after some revision?
7. Is the manuscript acceptable after major revision and must be reviewed again?
8. Would I willing to review the paper again?
9. It the manuscript not acceptable?
10. Do you wish your name as reviewer to be made known in the author(s)?

### Tips for Reviewers

- If you are unable to meet the deadline, please contact [Editorial support](#) immediately.
- If you will be unable to review a manuscript for an extended period of time, please click "Modify Unavailability Dates" on the bottom of your home page. Enter in the date ranges for the appropriate month(s) and click "Submit Dates." On the next screen, you must confirm your unavailability dates and again click "Submit Dates."

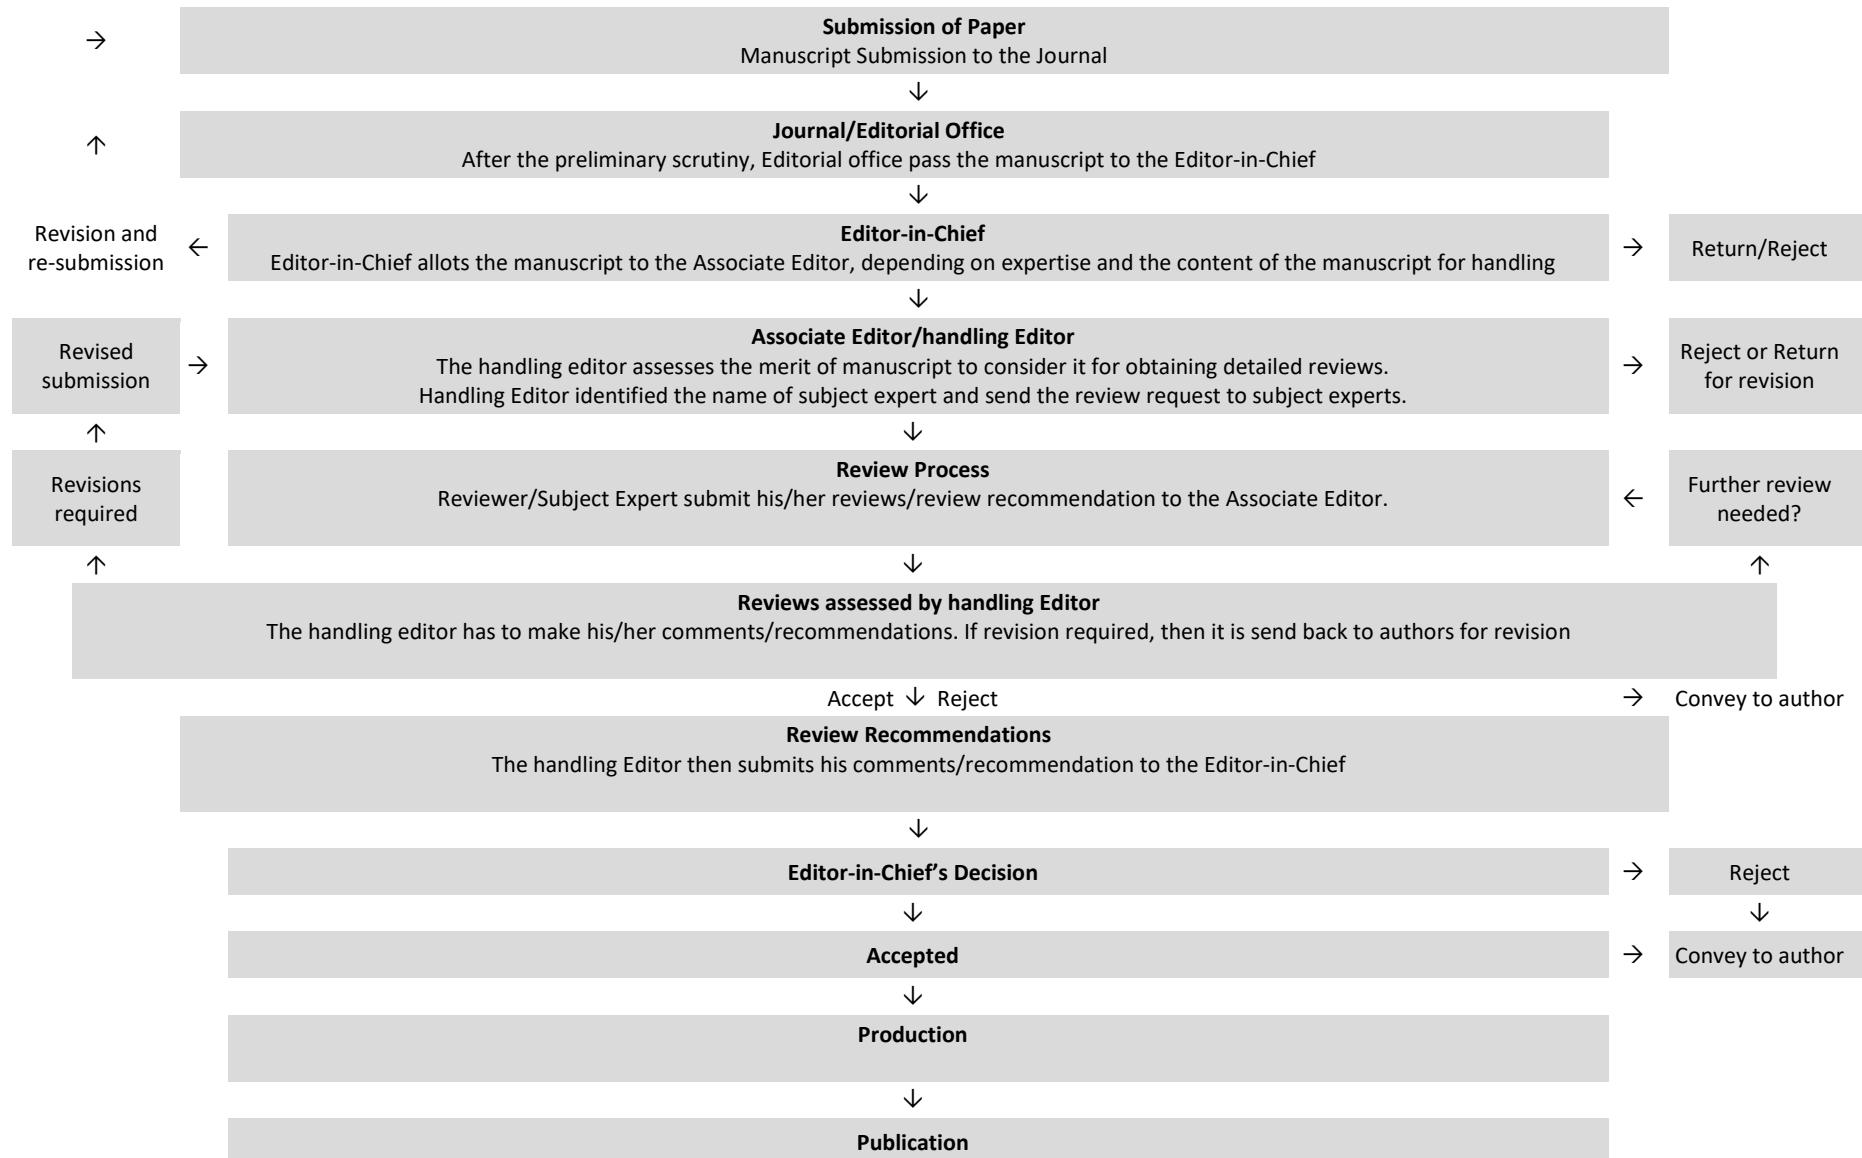

### Updating Your Profile

You can change your profile and/or update areas of expertise by selecting Modify Profile/Password, under General Tasks, at the bottom of your home page.

### **Getting Help**

If you need help, contact the [Editorial support](#).

Aries Privacy Policy | Data Use Privacy Policy

**NEW AUTHORS:** Please click the 'Register' link from the menu above and enter the requested information. Upon successful registration you will be sent an email with instructions on how to verify your registration.  
**Note:** If you have received an email from us with an assigned user ID and password, DO NOT REGISTER AGAIN. Just log in to the system as 'Author'.

**AUTHORS:** Please refer to the Instructions for Authors (follow the 'Instructions for Authors' link in the menu above) for details and additional information on how to prepare your manuscript to meet the journal's requirements. Please log in to the system as 'Author'. Then submit your manuscript and track its progress through the system.

**Note:** All source files you upload will be automatically compiled into a single PDF file to be APPROVED by you at the end of the submission process. While the compiled PDF will be used for peer-review purposes, your uploaded source files will be transferred to the publisher for publication upon acceptance. For further information about requested file formats for text and illustrations please refer to the Instructions for Authors. You can also contact the Editorial Office via the 'Contact Us' link.

**RETURNING AUTHOR:** Please use the provided username and password and log in as 'Author' to track your manuscript or to submit a NEW manuscript. (Do not register again as you will then be unable to track your manuscript).

**REVIEWERS:** Please log in to the system as 'Reviewer'. You may view and/or download manuscripts assigned to you for review, submit your comments for the editors and the authors, and track the progress of your manuscripts through the system.

**Note:** Please click the 'Accept' or 'Decline' button as soon as possible after receipt of the email asking you to review a manuscript.

**TO CHANGE YOUR USERNAME AND PASSWORD:** Log in to the system and select 'Update My Information' from the menu above. At the top of the Update My Information screen, click the 'Change Password' button and follow the directions.

**FORGOT YOUR PASSWORD?** If you have forgotten your password, please click 'Send Login Details' in the frame above and follow the directions.

**ANY FURTHER QUESTIONS?** Please click the 'Contact Us' link.

**Reviewer Recommendation and Comments for Manuscript Number JOSE-D-21-00064**

Stress shadow, Stress triggering and recent earthquake activity in the Kashmir Himalaya, India

Original Submission  
Naresh Kumar (Reviewer 1)

Recommendation:

**Transfer Authorization**

[Instructions]

\* If this submission is transferred to another publication, do we have your consent to include your identifying information?

Please Select Response  Yes  No

\* If this submission is transferred to another publication, do we have your consent to include your original review?

Please Select Response  Yes  No

**ORCID Reviewer Credit**

[Instructions]

\* **ORCID Reviewer Recognition.** Springer Nature can send verification of this review directly to ORCID. If you would like to take advantage of this service: 1. Please click on the "Yes" option below. 2. You will be asked to sign on/register with ORCID. 3. Then be transmitted to ORCID. 4. ORCID will display this information as a verified item from Springer Nature on your unique ORCID researcher profile

Please Select  Yes  No

**Review Questions**

\* **Publons Reviewer Recognition.** Springer Nature can send verification of this review directly to Publons (a subsidiary of Clarivate Analytics). If you would like to take advantage of this service, please click on the "Yes" option below. Your name, email address, title of the reviewed manuscript, name of the journal, and date of your review submission (the "Review Data") will then be transmitted to Publons after the final decision on the manuscript has been made. If you have already registered at Publons, they will notify you of the receipt of this review and update your profile as per your settings and their policy. If you are not registered with Publons, you will receive an email from them asking you to register in order for them to be able to recognize your review on your new profile page. Publons may use the Review Data to generate derivative metadata for the benefit of Publons and you as a reviewer, carefully considering the sensitivity of such information. For example, Publons may verify your record as a reviewer by updating your profile published on its webservice if you have registered for such service or help editors to identify candidate reviewers. Please find the details of processing in Publons' privacy policy <https://publons.com/about/terms>
